Customer’s Record

The model and serial number of this product may be found on the back of the unit. Register your Fuller Brush vacuum online at www.fullerbrushvacuums.com as soon as possible for your protection. Also, note the model and serial numbers of your unit in the spaces provided below, and retain this book as a permanent record of your purchase.

Model Number _______________________________________________________
Serial Number ______________________________________________________
Date Purchased _____________________________________________________

Your Fuller Brush vacuum cleaner is a product of high-quality materials and superior workmanship. We urge you to read these operating instructions carefully before you use this vacuum cleaner in order to obtain the full performance and satisfaction it can offer you.

Save These Instructions

Before you plug in your Fuller Brush vacuum cleaner, make sure the voltage indicated on the rating plate located on the back of the vacuum cleaner is the same as your local supply.
 IMPORTANT SAFETY INSTRUCTIONS

READ ALL INSTRUCTIONS BEFORE USING THIS APPLIANCE.
When using an electrical appliance, basic precautions should always be followed, including the following:

SAVE THESE INSTRUCTIONS.

WARNING: To reduce the risk of fire, electric shock or injury:

1. Do not leave appliance unattended when plugged in. Unplug from outlet when not in use and before servicing.

2. WARNING: ELECTRIC SHOCK COULD OCCUR IF USED OUTDOORS OR ON WET SURFACES.

3. Do not allow to be used as a toy. Close attention is necessary when used by or near children.

4. Use only as described in this manual. Use only manufacturer’s recommended attachments.

5. Do not use with damaged cord or plug. If appliance is not working as it should, has been dropped, damaged, left outdoors or dropped into water, return it to a service center.

6. Do not pull or carry by cord, use cord as a handle, close a door on cord, or pull cord around sharp edges or corners. Do not run appliance over cord. Keep cord away from heated surfaces.

7. Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.

8. Do not handle plug or appliance with wet hands.

9. Turn off all controls before unplugging.

10. Do not put any object into openings. Do not use with any opening blocked; keep free of dust, lint, hair and anything that may reduce air flow.

11. Keep hair, loose clothing, fingers and all parts of body away from openings and moving parts.

12. Do not pick up anything that is burning or smoking, such as cigarettes, matches or hot ashes.

13. Do not use without vacuum filters in place.

14. Use extra care when cleaning on stairs.

15. Do not use to pick up flammable or combustible liquids such as gasoline or use in areas where they may be present.

16. Do not attempt to service the unit while appliance is plugged in.
This product is equipped with a polarized alternating current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact an electrician to replace the obsolete outlet. Do not defeat the safety purpose of the polarized plug.

State of California Proposition 65 Warnings:
WARNING: This product contains one or more chemicals known to the State of California to cause cancer.
WARNING: This product contains one or more chemicals known to the State of California to cause birth defects or other reproductive harm.
Parts Identification

Replacement Belts and Filters

- Genuine Fuller Brush Vacuum Belts
  Part # FBJM-B2

- Genuine Fuller Brush Filter Set
  Part # FBJM-HEPA
How to Assemble and Operate the Vacuum

How to Attach the Handle to the Vacuum Cleaner
The vacuum and the handle are packed separately.

1. Slide the handle into the slots on top of the vacuum cleaner until it clicks into place (Fig. 1).
2. Turn the upper cord storage hook to the upright position and wind the power cord around the cord storage hooks when storing the vacuum cleaner.

How to Release the Power Cord
1. The upper cord storage hook has a quick-release action.
   To release the cord, rotate the hook downward and the cord will drop off the handle for immediate use (Fig. 2).
2. Return the hook to the upright position before attempting to rewind the cord.

On/Off Switch
1. To turn the vacuum on, push the power pedal on the side of the vacuum nozzle (Fig. 3).
2. To turn the vacuum off, push the pedal again.

Handheld Turbo Brush (Pet Model only)
1. Attach the brush to the storage holder on the vacuum (Fig. 4).

How to Empty the Dust Container
Always operate the vacuum cleaner with the dust container installed. Empty the dust container as needed or when it fills to the MAX line.

How to Empty the Dust Container
1. Unplug the vacuum cleaner. Press the dust container release button to remove it from the vacuum cleaner (Fig. 5).
2. Press the dust container empty button to open the base of the canister, releasing the contents into a trash bin or bag (Fig. 6).
3. Close the dust container lid until it clicks and replace the container into the vacuum.

How to Adjust the Height
How to Adjust the Height
1. Rotate the height adjustment dial to the type of floor being vacuumed (Fig. 7).

<table>

How to Adjust the Handle

The handle on this vacuum cleaner can be set to one of three positions – upright, middle or low.

How to Adjust the Handle
1. To release the handle, step on the handle release pedal on the left side of the vacuum cleaner nozzle and pull back the handle (Fig. 1).
2. Upright position – for storage or when cleaning tools are used (Fig. 2). Handle locks in this position.
3. Middle position – for normal cleaning (Fig. 3).
4. Low position – for cleaning under furniture (Fig. 4).

Note:
To prevent damage to carpets, never leave the cleaner turned on in one place for an extended period.

How to Clean the Filters

Your vacuum cleaner is equipped with two filters. These filters capture fine dust particles and protect the motor from dirt. Accumulated dirt will be collected on the filters and may restrict motor performance. It is important to clean the filters once a month or as needed.

How to Clean the Dust Container Filter
1. To access the filter, remove the filter assembly by removing the dust container lid. Turn the lid counter-clockwise until it clicks (Fig. 5).
2. Lift out the filter assembly and disassemble (Fig. 6).
3. Wash the dust container filter in cold water and thoroughly air dry before replacing.
4. Replace the filter and replace the dust container into the vacuum.

How to Clean the Exhaust Filter
The exhaust filter is located underneath the dust container.
1. Remove the dust container.
2. Remove the exhaust filter cover by turning the lid counterclockwise until it clicks (Fig. 7).
3. Lift out the exhaust filter (Fig. 7).
4. Wash in cold water and thoroughly air dry before replacing.
5. Replace the exhaust filter, filter cover and the dust container into the vacuum.

Note:
Do not wash filters with hot water or detergents.
On-Board Tool Cleaning

The Jiffy Maid is equipped with on-board cleaning tools including a metal wand (handle tube), stretch hose and crevice with dusting brush combination tool.

1. Remove the handle by pressing the tube release button and pulling the handle upwards (Fig. 1).
2. Remove the hose suction end from the side hose outlet (Fig. 2).
3. Attach the hose suction end to the handle hose inlet and the desired tool to the end of the handle tube (Fig. 3).
4. Rotate the height adjustment dial in a clockwise direction to the tools setting (Fig. 4).

Crevice Tool
The crevice tool is ideal for hard to reach places and along baseboards (Fig. 5).

Dusting Brush
The dusting brush is ideal for vacuuming delicate objects and surfaces.
The dusting brush is attached to the crevice tool and may be accessed by pressing the release button on the side and pulling the dusting brush to the end of the crevice tool (Fig. 5).

Handheld Turbo Brush (Pet Model only)
The turbo brush is ideal for whisking away pet hair from upholstery and carpeted stairs.

1. Remove the hose suction end from the side hose outlet.
2. Attach the turbo brush to the end of the hose (Fig. 6) or to the end of the handle tube (Fig. 7).

Note:
Only use the tools with the vacuum in the upright position. Turning the vacuum sideways helps prevent it from being pulled along by the stretch hose. Over extending the hose may cause the vacuum to tip over.
How to Replace the Vacuum Belt and the Headlight Bulb

CAUTION: First unplug the vacuum cleaner.

How to Remove the Bottom Plate
1. Place the vacuum cleaner in the lowest position by stepping on the handle release pedal (see “How to Adjust the Handle” on page 6). Turn the vacuum over on a flat surface exposing the bottom plate.
2. Remove the five screws holding the L-shaped bottom plate in place (Fig. 1).
3. Remove the bottom plate.

How to Replace the Belt
1. Turn the unit over and remove the bottom plate as described above.
2. Lift out the brushroll and remove the old belt (Fig. 2).
3. Loop the new belt around the drive shaft (Fig. 3) and the raised ring between the bristles on the brushroll (Fig. 4).
4. Pull the brushroll forward (against the pull of the belt) and reinsert the ends back into the nozzle (Fig. 5) making sure to line up the end opposite the belt so the flat edges slide down properly.
5. Turn the brushroll by hand, making sure the belt is not twisted and all rotating parts move smoothly.
6. Replace the bottom plate and the five screws.

How to Replace the Bulb
1. Place the vacuum cleaner in the lowest position by stepping on the handle release pedal.
2. Remove the two screws from the headlight lens (Fig. 6).
3. Remove the lens and replace the bulb (Fig. 7).
4. Replace the headlight lens and the two screws.
Your Fuller Brush vacuum cleaner comes equipped with a thermal protector designed to protect your vacuum cleaner from overheating due to restricted airflow (i.e. clogged hose). Should this situation occur, the thermal protector will automatically shut the motor off to avoid any potential damage.

**NOTE:** To determine if the thermal protector turned off the vacuum cleaner, refer to the vacuum cleaner’s headlight. **If the headlight is on while the motor is off, then the thermal protector did safely shut down the motor.** If the headlight and motor are both off, then there is some reason other than the thermal protector (i.e. pulled plug) the vacuum cleaner has shut down.

**How to Reset the Thermal Protector**
1. Unplug the vacuum cleaner.
2. Allow the vacuum cleaner to cool at least 60 minutes.
3. Check for blockages, empty the dust container and clean the filters.
4. Plug the vacuum cleaner in and begin using.

Please contact your Fuller Brush retailer with any questions.

---

**For Best Performance**

- Keep machine and all accessories clean and in good operating condition.
- Empty dust container as needed or when it fills to the MAX line.
- Clean filters every month or more frequently if vacuuming fine powders such as flour or dry wall dust.
- Always use genuine filters and parts, as use of other products may result in poor cleaning or filtration performance. Fuller Brush filtration products are designed for maximum performance.
- Store machine carefully in a dry area.
- For optimum cleaning performance and safety, follow your owner’s manual.
## Troubleshooting Guide
